

## MY BODY

Prepared by Dr. Mohammed Saleh

### PART 1: READ

وَفِي أَنْفُسِكُمْ أَفَلَا تُبْصِرُونَ (الذاريات)

(Picktall) And (also) in yourselves. Can ye then not see? -

### PART 2: LEARN

#### Major systems of the human body

1. **Cardiovascular system**: blood circulations with heart and blood vessels
2. **Digestive system**: processing food with mouth, stomach and intestines
3. **Endocrine system**: communicating within the body using hormones
4. **Excretory system**: eliminating wastes from the body
5. **Immune system**: defending against disease-causing agents
6. **Integumentary system**: skin, hair and nails
7. **Muscular system**: moving the body
8. **Nervous system**: collecting, transferring and processing information with brain and nerves
9. **Reproductive system**: the sex organs
10. **Respiratory system**: the organs used for breathing, the lungs
11. **Skeletal system**: structural support and protection through bones.

### PART 3: THINK & CONNECT

What would happen if these 11 systems stop working together? Give examples.
